DETAILED ACTION

EXAMINER'S AMENDMENT

[1] An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Arnold (Reg. No. 48,894) on October 5, 2005.

The application has been amended as follows:

1. In Claim 8, Line 1, after "compression", please add the word "paddle".
2. In Claim 9 Line 1, after "a" and before "a", please replace "support usable in" with --computer readable medium usable by--.
3. In Claim 9 Line 3, after "executed" and before "the", please replace "within" with --by--.

REASONS FOR ALLOWANCE

[2] The following is an examiner's statement of reasons for allowance:

Prior art was found and applied for the claim limitations as set forth in the previous non-final and final office actions. The claims presented in the RCE recites *inter alia*:

“unambiguously distinguishing a *densest area* of the breast from an area of the paddle containing the graduated marks ...”.

This limitation translates to detecting graduation marks in images of the breast with graduated marks. Osaki discloses detecting graduation marks in images, so one could argue that it would be obvious to apply the similar method to breast images. However, it is found

that there would no motivation to apply Osaki's method to breast, since Osaki teaches a generic concept with no specific application to breast images. Furthermore, the instant invention distinguishes the *densest area of the breast*, which is not disclosed by prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
